¹ Assumes 6% premium bonus special on North American Secure HorizonSM Accelerator. The premium bonus increase may be modified or discontinued at any time without notice. All decisions are at the sole discretion of North American and are final. No exceptions will be made. Premium bonus may be subject to a premium bonus recapture. Products that have premium bonuses may offer lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins than products that don't offer a premium bonus. Over time and under certain scenarios the amount of the premium bonus may be offset by the lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins. The premium bonus is not recaptured in the event of death of the annuitant. No premium bonus recapture will occur on any penalty-free withdrawal amount, or under the nursing home confinement waiver or on any rider charge.

² Rates are effective as of publication date and are subject to change.

³ Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from your accumulation value for Strategy Charges could exceed interest credited to the accumulation value, which would result in an overall reduction of premium.

Fixed index annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from the accumulation value for optional benefit riders or strategy fees or charges associated with allocations to enhanced crediting methods could exceed interest credited to the accumulation value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index.

The term financial professional is not intended to imply engagement in an advisory business in which compensation is not related to sales. Financial professionals that are insurance licensed will be paid a commission on the sale of an insurance product.
